

THE MSB INSIDER

MAYVILLE STATE BANK CUSTOMER NEWSLETTER

Why are EMV Chip Cards Safer?

EMV chip cards are built to deter fraud. When the card is inserted into the checkout terminal, the tiny processor chip sends an encrypted one-time code through the payment network. Even if the code is intercepted, it cannot be used again to authorize a purchase. This is a well-tested technology that has been widely used outside of the U.S. for over a decade.

Have you gotten a new EMV card yet?

You can have the added security of an EMV chip card **today!** For only \$5 you can get an instant issue debit card at our Supermarket Office inside Wingert's Food Center. You can choose your favorite design and walk out with an active debit card!

In this Issue

- Why are EMV Chip Cards Safer?
- Person to Person Payments Now Available!
- Let Us Finance Your Home Remodel!
- MasterCard Priceless Surprises
